HTML Language Code Reference

❮ Previous Next ❯

ISO Language Codes

You should always include the `lang` attribute inside the `<html>` tag, to declare the language of the Web page. This is meant to assist search engines and browsers:

```
<html lang="en">
...
</html>
```

In XHTML, the language is declared inside the `<html>` tag as follows:

```
<html xmlns="http://www.w3.org/1999/xhtml" lang="en" xml:lang="en">
...
```
